FUDCon Kuala Lumpur 2012
Guide Book

fudcon

KUALA LUMPUR 2012

Welcome to FUDCon!

I say that a bit oddly -- I'm sad that I cannot myself actually be in Kuala Lumpur to join the Fedora contributors and those who have come to learn about Fedora and free and open source software for this event. Never fear, though, you are in good hands: I know that the leaders of Fedora who are present will make this event successful, and that the future leaders among you will make the best of their opportunities to grow and contribute in new ways. Most importantly, I know that the local team who put together this FUDCon will do a fantastic job in their own right to make you all feel welcome at this event.

A few additional notes:

* READ THIS BOOKLET! It's filled with good information -- the schedule, information about where to be and when to be there, emergency contact information, maps, and more.
* Please do your best to be on time, and stick to the conference schedule! You're in Kuala Lumpur to learn, share, and Get Things Done -- make the best of your time here.
* Remember that the majority of Fedora contributors aren't at this FUDCon with you -- but we do want to hear about what you're learning and accomplishing. See page ____ for information about using IRC, blogging, and microblogging your experiences to share with others.

I'd like to thank the University College of Technology and Innovation (UCTI). Their help, support, and generosity in providing facilities for this event make it possible for us to gather here today.

Last, but not least: This event would not have happened without the hard work of the local FUDCon planning team. If you see them, shake their hand. Heck, even give them a hug! It's no small feat to put together an event like this, and I hope that everyone reciprocates the team's hard work by making the best of the FUDCon experience for themselves.

I know that you will all have a fantastic time at FUDCon: Kuala Lumpur. You'll do great things this weekend -- get to it!

Big hugs from across the pond,

Robyn Bergeron
Fedora Project Leader

Blogging

If you are writing blog posts about FUDCon, we welcome you to join us on Fedora Planet requires a FAS account that has signed the CLA and is approved for one additional group. If you are new to Fedora but know someone who would be willing to add your blog to Planet, ask them.
If you were sponsored to come to FUDCon, we request that you write at least one blog post for Planet.
planet.fedoraproject.org

Microblogging

Our main IRC channel on Freenode is #fedora-fudcon. If you are transcribing a session, pleas report the session nam and IRC channel to the main channel. If you are using Gobby or EtherPad in your hackfest, pleas make a note of this in the main channel as well

IRC Channel

Microblogging is one of the best ways to promote FUDCon and receive timely updates from event organizers and attendess. Use the hashtag #fudcon, which can be monitored from your microblogging client

[Talk]

- Adding Fedora support to existing Puppet modules
- Advanced RPM packaging
- An Introduction to Puppet And Usage In Cloud Environment
- Ask Fedora
- Boxgrinder : Bake your 1st virtual appliance
- Child's Play
- Contribute to Fedora as active ambassadors
- Contributing to Fedora
- Darkserver, way to new world
- Effective Localization Crowdsourcing
- End User Experience
- Fedora in your school
- Fedora in Education
- Fedora APAC in 2012
- Fedora and GSoC 2012
- Fedora Videos
- Fedora Tour
- Fedora sub-teams intro
- Fedora Quality Assurance
- Fedora Web of Trust
- Friends
- Free Software, Open Source and Creative Commons
- Fighting Spam with Postscreen
- Git, OpenShift and the Dreyfus Model
- GNOME 3 - Chance and Burden for Lightweight Desktop Environments
- How to internationalize and localize your software
- Lightning Talks #1
- Lightning Talks #2
- Lightweight OS virtualization using LXC

[Workshop]

- Creating Chinese Documents with LibreOffice in Fedora Linux
>*This workshop will demonstrate how to use commonly available tools for writing Chinese text in Fedora Linux and LibreOffice*
- Fun with LiveCD
- Python Workshop
> *Pre-requisite : Knowledge of programming*

[HackFest]

- RPM Packaging
> *Pre-requisite : Fedora,development-tools,fedora-packager*
- TBD
>*Pre-requisites : Fedora VM with puppet installed*

[Disscussion]

- *Group discussion about things and tips to do with Fedora on SSDs*
> *Pre-requisites : Fedora,SSDs and knowledge of SSDs?*

What's a BarCamp conference?
Our presentation and workshops are organized in an ad-hoc fashion, inspired by BarCamp events (www.barcamp.org)

BarCamps are participant-driven events, and anyone who wants to run a session is invited to do a pitch. Your pitch advertises your talk and convinces other people to vote for it and attend.

After the pitches, conference participants will quickly vote on which pitches they would like to see the most. The session titles will be posted on the wall on pieces of paper. Each participant should make a tally mark on the session proposals that interset the the most, marking as many proposals as they like. Talliest allow the organizers and participants to reduce conflicts, combine two like subjects, or remove sessions with low interest.

Scheduling of sessions is also a collaborative effort. Spekers and attendees work with each other to eliminate conflicts and produce a logical schedule. Once the schedule is completed, it is transcribed to the wiki for everyone's reference.

We only have 90 minutes for the introduction, pitches and scheduling, so it is incredibly important that we start on time at 9:00 a.m. an that we stay on topic and on our schedule.

The Rule of Two Feet is encourage. This rule is simple: You are not required to stay in a session that loses your interest. If you find the presentation is not what you thought it would be, use your two feet to find an alternative session. If you'd like a sessin leadr to cover a different kind of material, ask them about it. (Nicely, of course-we value courtesy along with flexibility)

Sound confusing? In principle, you'd be right. In practice, though, this process results in a dynamic engaging ad information-packed event. The combination of collaboration, flexibilty and user-driven content makes it nearly impossible to leave the conference dissatisfied. Once you've experienced a BarCamp style event, you may find you enjoy it more than other formats!

Fedora Malaysia

Fedora Malaysia consists of the users and contributor of fedora who joined together for discussion and sharing of fedora becoming solid community. Fedora malaysia also do some activities such as event with Fedora and FAD

FAD

The Fedora Activity Day (FAD) is a regional event (either one-day or a multi-day) that allows Fedora contributors to gather together in order to work on specific tasks related every 6 month to the Fedora Project :
-FAD Malaysia - May 2009
-FAD KL - September 2011
-FAD KL - January 2012
-FAD KL-UKM - September 2012

Event with Fedora

-Fedora 11 Release Party
-MyGossCon 2009
-FOSS.my 2009
-Fedora Showcase at UM, 2009
-Jim Whitehurst Visit 2009
-December meetup 2010
-Fedora 13 Release Event
-MOSC 2011
